

Employee Handbook

1. Purpose

The Northstar Operations Group Employee Handbook summarizes baseline workplace expectations for all employees. It points employees to specialized policies for PTO, remote work, travel, procurement, data handling, and IT access.

2. Employment And Conduct

Employees are expected to act professionally, protect company information, and follow approved business processes. Employees may not use informal approvals or unapproved tools to avoid policy requirements.

10. Remote And Hybrid Work

Remote and hybrid employees must remain available during team operating hours, attend required meetings, and follow the Remote Work Policy. Core collaboration hours are defined in the Remote Work Policy and may be adjusted by department leadership for business needs.

11. Employee Information Privacy

Employee medical, accommodation, payroll, personnel, and private contact information is confidential. Employees may not request, access, or disclose another employee's private information unless HR has approved a legitimate business need and the access is provided through an approved system.

12. Questions And Escalation

Policy questions should be directed to the responsible team. HR handles PTO, employee relations, accommodations, and payroll questions. IT handles system access and security questions. Procurement handles software and vendor requests. Legal reviews contracts and legal questions.
