

Northstar Operations Group - Acceptable Use Policy

Acceptable Use Policy

1. Purpose

The Acceptable Use Policy defines appropriate use of Northstar technology, networks, devices, accounts, and information systems.

2. Approved Systems

Employees must use approved company systems for company work. Personal email, personal file sharing, unapproved AI tools, and unapproved browser extensions may not be used to store or process confidential or restricted company information.

3. Credentials And Authentication

Employees must protect passwords, API keys, tokens, MFA codes, and credentials. Credentials may not be shared with coworkers, vendors, public tools, or personal accounts. Attempts to bypass authentication, access controls, logging, or security monitoring are prohibited.

4. Data Handling

Confidential and restricted data must remain in approved systems. Employees must not copy restricted data into public tools, personal devices, or unmanaged locations.

5. Reporting

Lost devices, suspected credential exposure, accidental data disclosure, or unsafe system behavior must be reported to IT Security immediately.
